FOREWORD

The 1982 Annual Report of Illinois chartered Credit Unions is published as required by Section 9 of the Act.

1982 was a year in which Illinois Credit Unions were among the fastest growing financial institutions in the United States in terms of savings. Savings at the 924 Illinois Credit Unions grew 18.5% to a record $2.76 Billion in 1982, over four times the growth rate in 1981. By comparison consumer savings grew 9.3% at banks and 7.9% at savings and loans in statistics reported by the National Credit Union Administration.

The next decade should prove challenging to Illinois Credit Unions but 1982 has shown that they are equal to the task and should be well positioned to continue providing excellent savings and credit opportunities to their shareholders.

Financial Review

1982 was a challenging year for credit unions. The economy forced several manufacturing plants to close and left their credit unions to manage loan portfolios whose repayment was in large part dependent on employees seeking work and without the benefit of payroll deduction. The composite delinquency rate increased from 2.8% of total loans at the beginning of 1982 to 5.8% at year-end.

New loans granted in 1982 decreased 14.8% over 1981 down from $1,243,151,139 to $1,058,942,244 while the loan to share ratio declined to 62.1% down from 76.3% at year-end 1981. To appreciate the role of the economy and the soft loan demand in 1982 one only has to think back to 1979 when the loan to share ratio was 93.5% and income from loans comprised 86.5% of total income. The income from loans in 1982 comprised 67.1% of total income with the remaining 32.9% largely from investments.

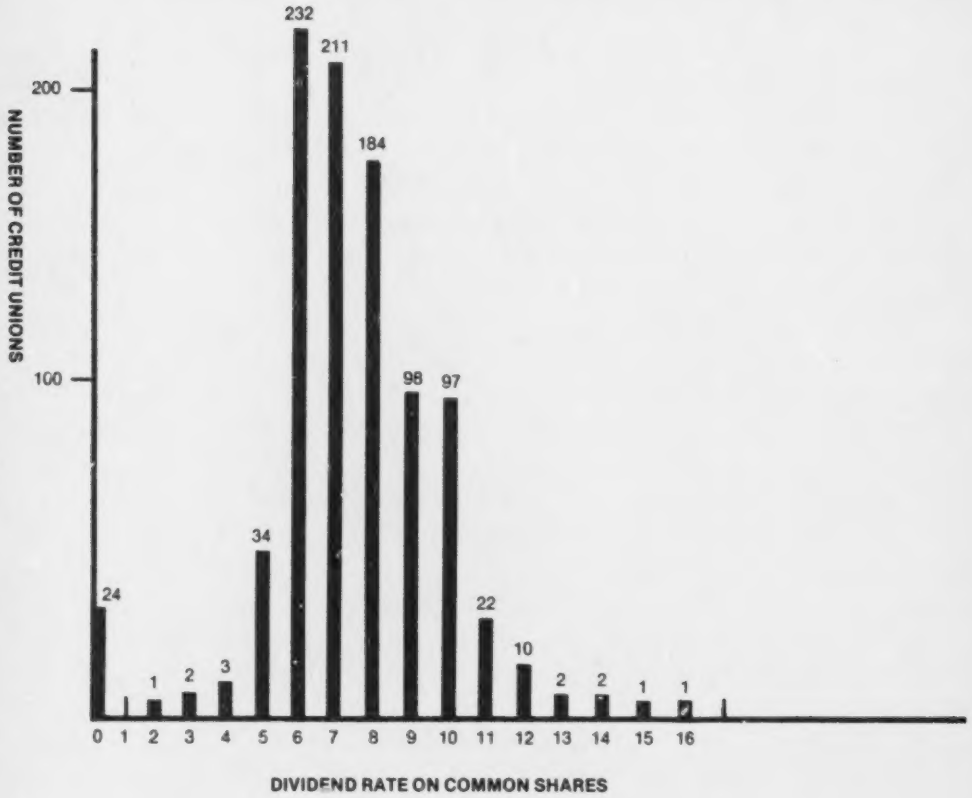
The deregulation of the usury rates in September 1981, allowed credit unions as well as all financial institutions to price their loan rate to the market which resulted in an increase in the yield on average loans outstanding to 13.4% compared to 12.7% in 1981. The yield on average assets other than loans decreased in 1982 to 10.0% down from 13.6% in 1981. This decrease was in large part due to the dramatic drop in interest rates available to credit unions on their investments during the last 6 months of the year. The overall yield on average assets remained the same as last year at 12.5% with the higher yield on loans counterbalanced by the lower average yield on investments.

While 1981 was the first year since 1977 that the net margin between yield on average assets and dividend expense on average shares had increased, this net margin decreased by .1% in 1982 due to a higher dividend expense on average shares of 8.5% compared to 8.4% last year as illustrated below:

	1980	1981	1982
Yield on Average Assets	10.8%	12.5%	12.5%
Dividend on Average Shares	7.3	8.4	8.5
Net Margin	3.5%	4.1%	4.0%

Credit unions have provided an attractive alternative to other financial institutions regarding the dividends paid to shareholders. The following graph illustrates the distribution of dividends the 924 credit unions paid to shareholders on common shares (passbook savings).

Of the 924 credit unions, 828 or 90% returned dividends in excess of the 5.50% maximum rate of interest allowed by other financial institutions.



PATTERNS OF SHARE GROWTH

The Table below illustrates the increasing importance of classes of shares and share drafts over the last 5 years. Two columns are provided for 1982, column A for all 924 credit unions and column B with the share deposits of United Airlines Employees Credit Union totaling $451,947,880 (of which 95.3% are common shares) deleted.

INCOME AND EXPENSE

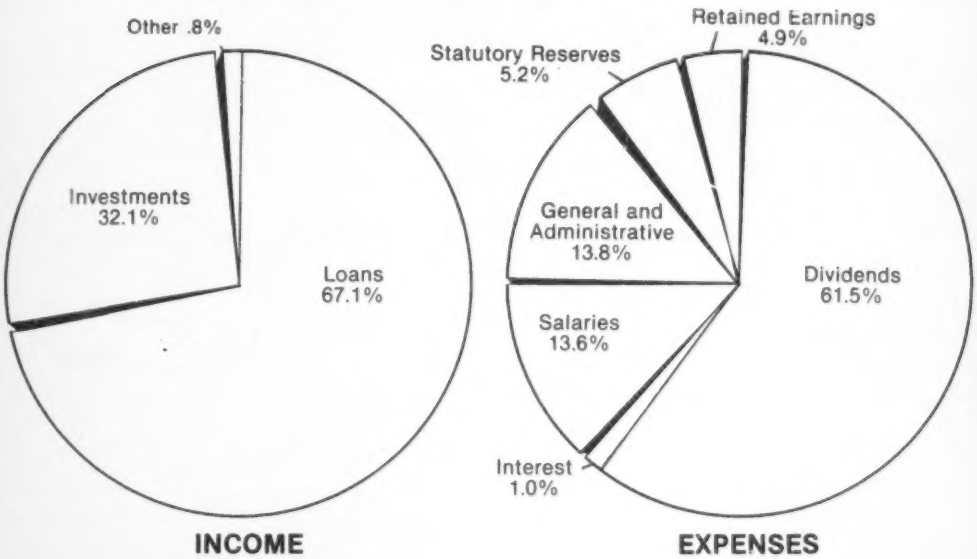
The percentage of total income derived from loans fell approximately 4% from 71.1% in 1981 to 67.1% in 1982. Soft loan demand in 1982 resulted in 38.8% of assets in the form of investments up significantly from 26.5% in 1981.

The sharp drop in rates available to credit unions on their investments during the last half of 1982 and the somewhat higher dividends paid to shareholders resulted in a drop in the percentage of gross income transfered to Reserves and Undivided Earnings from 11% in 1981 to 10% in 1982.

A summary of the major consolidated income and expense allocations is as follows:

INCOME AND EXPENSE

Distribution for Illinois Credit Unions in 1982



LOAN DELINQUENCY

1982 was a challenging year for credit unions. Several sponsor plants closed or experienced heavy layoffs or employee strikes which hit the automotive and construction industry especially hard. As of the writing of this report, the employee strike at several Caterpillar plants across Illinois is in its 6th month. Loans delinquent 2 months or more at year end totalled $91,747,273 or 5.8% of total loans outstanding at year-end up drastically from 2.8% in 1981.

While loan delinquency increased in 1982, the year showed significant improvement as far as net-chargeoffs as a percent of income and the provision for loan loss expense were concerned. Net-chargeoffs as a percent of income decreased from 4.7% in 1981 to 3.1% in 1982 and provision for loan loss expense decreased 12.7% to 11,976,235 or 3.7% of gross income as compared to 4.7% of gross income in 1981.

Real Estate Lending

The Credit Union Act was amended in October 1974 to permit credit unions with assets in excess of $1.0 million to make loans to members secured by real estate. The following table summarizes this lending activity. (Columns 3-6 are statistics only from credit unions shown in column 2 which reported outstanding real estate loans.)

Year	CU's with Assets of $1.0 Million or more	CU's Reporting R.E. Loans	Total Real Estate Loans at 12/31 (000's)	% of Loans at 12/31 —	Real Estate Loans Made during year (000's)	% of All Loans Extended	Real Estate Loans as % Of All CU loans
1975	228	7	$ 588	2.4%	$ 590	3.5%	.06%
1976	248	11	$18,861	13.0%	$18,868	16.9%	1.7 %
1977	282	21	$43,725	15.3%	$22,197	11.8%	3.2 %
1978	300	21	$65,024	18.1%	$25,172	10.9%	4.0 %
1979	310	23	$66,246	16.1%	$19,173	8.4%	3.7 %
1980	304	25	$72,362	17.9%	$10,043	5.4%	4.5 %
1981	307	28	$79,321	17.9%	$ 9,740	4.0%	4.8 %
1982	332	27	$77,255	17.8%	$ 5,907	3.0%	4.9 %

Due to a change in reporting forms, the 1980 totals are only for first mortgage loans. Previous year's data includes both first and second mortgage lending.

The lack of widespread real estate lending is suggested by the small number of eligible credit unions making such loans. As in previous years approximately two-thirds of the activity reported was by Construction Equipment Credit Union (formerly Caterpillar Employees), Peoria.

Share Insurance

The Illinois Credit Union Act required all Illinois chartered credit unions to make application for share insurance no later than December 31, 1981 and receive a commitment for share insurance by December 31, 1984.

At year-end 1982 there were 893 insured credit unions of which 840 had share insurance through the National Credit Union Administration (NCUA) and 53 had insurance with the National Deposit Guarantee Corporation (NDGC). The remaining 31 credit unions with total shares of approximately $5 million had requested extensions of time to correct the deficiencies and reapply.
